§ 40050. Functions

The primary function of the California State University is the provision of ~~instruction for baccalaureate and postbaccalaureate education of undergraduate students, and graduate students, and postbaccalaureate students through the doctoral degree-master's degree,~~ in the liberal arts, ~~and~~ sciences, ~~in~~ applied fields and in the professions, including the teaching profession. All proposed California State University doctoral degrees will be reviewed by the University of California to verify that the proposed degree does not duplicate a University of California doctoral degree program that is offered or is under review by the University of California. These professional or applied doctoral degrees may also be awarded jointly with a University of California university or private California institutions of higher education that are accredited by the WASC Senior College and University Commission. Presently established two-year programs in agriculture are authorized, but other two-year programs shall be authorized only when mutually agreed upon by the Board of Trustees of the California State University and the Board of Governors of the California Community Colleges. ~~The doctoral degree may be awarded jointly with the University of California, or jointly with a private institution of higher education accredited by the Western Association of Schools and Colleges, provided that in the latter case, the doctoral program is approved by the California Postsecondary Education Commission.~~ Faculty research is authorized to the extent that it is consistent with the primary function of the California State University and the facilities provided for that function.
