

AMENDED

AGENDA

COMMITTEE ON EDUCATIONAL POLICY

Meeting: 11:30 a.m., Tuesday, March 24, 2020
Virtually via Teleconference

Peter J. Taylor, Chair
Jane W. Carney, Vice Chair
Silas H. Abrego
Rebecca D. Eisen
Douglas Faigin
Debra S. Farar
Wenda Fong
Juan F. Garcia
Maryana Khames
Lillian Kimbell
Romey Sabalius
Christopher Steinhauser

Consent 1. Approval of Minutes of the Meeting of January 29, 2020, *Action*
2. Academic Planning, *Action*
3. Academic Preparation, *Information*

Discussion 4. Approval of Recommended Amendments to Title 5 Regarding Occupational Therapy
Doctorate Degree Programs, *Action*

**MINUTES OF MEETING OF
COMMITTEE ON EDUCATIONAL POLICY**

**Trustees of The California State University
Office of the Chancellor
Glenn S. Dumke Conference Center
401 Golden Shore
Long Beach, California**

January 29, 2020

Members Present

Peter Taylor, Chair
Jane W. Carney, Vice Chair
Silas H. Abrego
Rebecca D. Eisen
Douglas Faigin
Debra S. Farar
Wenda Fong
Juan F. Garcia
Maryana Khames
Lillian Kimbell
Romey Sabalius
Christopher Steinhauser

Adam Day, Chair of the Board
Timothy P. White, Chancellor

Trustee Taylor called the meeting to order.

Approval of Minutes

The minutes of November 19-20, 2020 were approved as submitted.

Amendments to Title 5 Regarding Occupational Therapy Doctorate Degree Programs

Loren J. Blanchard, executive vice chancellor, began the presentation by noting that the Board of Trustees sponsored legislation to grant the CSU authority to offer the doctoral degree in occupational therapy or Occupational Therapy Doctorate (OTD). This bill was approved by the legislature and signed into law by the governor, amending State Education Code.

Alison Wrynn, associate vice chancellor, Academic Programs, Innovation and Faculty Development continued the presentation by sharing that the CSU occupational therapy programs meet a growing workforce need, followed by presenting the proposed Title 5 amendments to be approved in the March meeting.

Following the presentation, trustees asked questions related to the campuses at which the doctoral programs will be offered.

Research, Scholarship and Creative Activities

Ganesh Raman, assistant vice chancellor, Research, shared examples of research, scholarship and creative activities that provide a high-quality education where CSU students can engage with course content, develop and test hypotheses and push boundaries. He outlined how these efforts have been supported by federal and other external grants, contracts and awards. In 2017-18, the CSU received nearly \$648 million in external funding, an increase of \$58 million over the previous year. Research, scholarship and creative activities also enable the CSU to maintain faculty excellence by recruiting and retaining top-tier, world-class faculty, while ensuring students receive a cutting-edge education.

President William A. Covino of California State University, Los Angeles, shared the story of Ariana Gonzalez, an alumna of Cal State LA, and how research connected her lived personal experience to her overall academic and career goals.

Following the presentation, trustees had specific questions regarding how the CSU ensures that research faculty are supporting undergraduate discovery, learning and mentoring; the number of tenure-track faculty that pursue research; and how many faculty are awarded grants that cover the cost of research buy-outs.

Admission Requirements: Quantitative Reasoning

Loren J. Blanchard, executive vice chancellor, began by presenting a proposal to approve a phased implementation to modify the CSU's admissions requirements for board action. The modification would require incoming first-year students, beginning in fall 2027, to have completed one additional course of quantitative reasoning to be eligible for admission. The proposal had unanimous support of the 23 CSU campus presidents.

James T. Minor, assistant vice chancellor, continued by defining quantitative reasoning, which is the ability to think and to reason analytically and intelligently about numbers, measurement, capacity or probability throughout one's personal and professional life. He continued by sharing details on the analysis of data provided by the California Department of Education as well as highlighting the public comprehensive universities in other states with admission requirements comparable to those proposed.

Marquita Grenot-Scheyer, assistant vice chancellor, Educator Preparation and Public School Programs, discussed details of the proposal. The requirement could be fulfilled with a high school science course, an elective with a quantitative reasoning foundation, such as personal finance or computer science, or a more traditional mathematics course beyond Algebra 2. It could also be met with a quantitatively based Career and Technical Education class or through dual enrollment in partnership with a local community college. She recommended the approval of the phased implementation, which would include a Title 5 amendment that will be submitted to the Board for approval by spring 2022. The implementation will also include an independent analysis of the requirement's implementation and impacts, the formation of a steering committee, and increases in investment in teacher preparation and student outreach.

Following the presentation, trustees had a number of questions and comments. These questions included, but were not limited to: a request for demographic data of the group of students that enrolled in CSU with an additional year of quantitative reasoning coursework and those without the additional preparation; acknowledgment of the CSU's earnest effort to accommodate an impact study before voting to approve the proposal; consideration of opportunities to intervene earlier in a student's educational path; and a recommendation regarding the external organization to perform the independent analysis.

The committee unanimously recommended approval of the proposed resolution. **(REP 01-20-01).**

Trustee Taylor adjourned the Committee on Educational Policy.

COMMITTEE ON EDUCATIONAL POLICY

Academic Planning

Presentation By

Loren J. Blanchard
Executive Vice Chancellor
Academic and Student Affairs

Alison M. Wrynn
Associate Vice Chancellor
Academic Programs, Innovations and Faculty Development

Summary

In accordance with California State University (CSU) Board of Trustees policy established in 1963, this item summarizes the CSU academic planning process, including the long-range program planning activity that occurred since January 2019. The proposed resolution approves additions and modifications to campus academic plans and the CSU Academic Master Plan.

Background

Six areas of academic planning activity are reported in this item, and a proposed resolution concerning changes to the CSU Academic Master Plan is presented. The academic planning topics include:

1. Changes to program projections
 - New projections proposed for addition to ten-year campus academic plans and to the CSU Academic Master Plan (**Attachment A**)
 - Existing projections that will be removed from the CSU Academic Master Plan and campus academic plans
2. Changes to existing degree programs
 - Degree programs suspending new admissions
 - Discontinuance of existing degree programs
3. Total units required for Bachelor of Arts (BA) and Bachelor of Science (BS) degree programs
4. Summary of Western Association of Schools and Colleges (WASC) Senior College and University Commission accreditation visits (**Attachment B**)
5. Accredited academic programs and departments (**Attachment C**)
6. CSU degree proposal, review and approval process (**Attachment D**)

Offering traditional and emerging degree programs, the CSU is an engine of social mobility, educating many students who are the first in their families to attend college. According to data from the U.S. Department of Labor and California's Employment Development Department, the educational opportunities represented by CSU degree programs provide our graduates with a mid-career salary that, on average, is more than \$8,500 higher than graduates from other public universities. As a result of ongoing degree program planning and development that responds to employment demands and student interest, the CSU awards more than 107,000 bachelor's degrees every year, adding to the 3.7 million CSU alumni who keep California's economy vibrant and growing.

Degree planning is a critical first step in the development of educational programs designed to meet the needs of California's skilled and diverse workforce. The CSU delivers more job-ready graduates into the workforce than any other public or private university in the state. The CSU produces 50 percent or more of California's graduates in agriculture, business, criminal justice and public administration. As can be seen in the chart below, there are also opportunities for enrollment growth in the areas of engineering, life science and information technology.

Past Projections

As a result of trustee approval of projections in past years, in 2019, thirty-three new degree programs were approved by the Office of the Chancellor.

Degrees that were developed and approved during this time frame include two new Doctor of Audiology (AuD) degrees at CSU Sacramento and at San José State University. Two Doctor of Nursing Practice (DNP) degree programs were converted from pilot programs to regular program status at CSU Fresno and San José State University. Additionally, allied health degree programs were newly approved at Channel Islands (MS in Nursing), Fullerton (BS in Public Health), Humboldt (BS in Nursing), and San Bernardino (BS in Public Health, BS in Health Services Administration, BS in Nutritional Science and Dietetics, BS in Environmental Health Science).

The discipline of Engineering continues to be an area of programmatic interest on CSU campuses. Dominguez Hills (MS in Systems Engineering), Fullerton (MS in Engineering Management), and Pomona (MS in Engineering, MS in Mechanical Engineering, MS in Systems Engineering) developed new degree programs that will allow CSU Students to move directly into rewarding careers.

Finally, several new fine arts degrees were approved as campuses worked towards developing degree programs that met national accreditation standards in the arts as well as emerging trends in the disciplines.

The following chart provides a breakdown of the disciplines in which new degrees were approved in 2019.

New Programs by Discipline and Degree Level Approved in 2019

Current Year Program Proposals

This year, the Office of the Chancellor received 35 projections for new degree programs. A degree proposal may be developed only after trustees approve the preliminary step: a degree projection, which is a long-term plan to develop a degree program.

This year, campuses proposed an increased number of state-supported undergraduate programs compared to previous years. Ninety percent of the projected degree programs were for state-support programs. This reflects the state's renewed investment in the CSU in this year's State budget.

Following a multi-year trend, we continue to see a growing number of degree programs that are well-aligned with future workforce needs, particularly in the field of health and allied health sciences. For example, there are projections for 11 new degree programs in health-related fields at eight campuses ranging from baccalaureate to doctorate. This includes degrees in: Audiology, Biomedical Engineering, Epidemiology, Nursing, Nutrition, Occupational Therapy, Public Health, and Speech and Language Pathology.

The new Occupational Therapy Doctorate will be offered at CSU Dominguez Hills and San José State University. According to the State of California Employment Development Department, current employment demand for Occupational Therapists is projected to increase from 133,000 openings in 2018 to 156,800 by 2028. This 18% growth is greater than the average growth rate for all occupations in the nation. Current employment demand for Occupational Therapists in California is projected to increase from 11,300 openings in 2016 to 14,100 by 2026, approximately 14% faster than the average rate of growth for all occupations in the state.

Another area of significant labor force need is in data science. There are four new degree projections in data science and data analytics. In California alone, the State of California Employment Development Department has forecasted demand for this field will grow by 20%, approximately 9% faster than other areas.

To ensure that proposed CSU degree programs are relevant and responsive to state needs, campuses consider local and statewide ongoing and emerging workforce needs. This year, new program projections continue to reflect workforce needs in the engineering, allied health and data science fields. As you can see on the chart below, these areas are among the fastest growing professional areas in California and across the nation. The State of California Employment Development Department anticipated occupational expansion of approximately 10% in the engineering field, 18% in allied health and 19% in data science between 2016 to 2026.

(State of California Employment Development Department, 2019)

To educate students in one of these areas, six campuses are seeking trustee authorization to develop allied health degree programs including: Dominguez Hills (MPH in Public Health, OTD in Occupational Therapy), Monterey Bay (MS in Nursing), San Bernardino (MA in Speech-Language Pathology), and San Diego (MS in Epidemiology), San Francisco (AuD in Audiology), and San José (OTD in Occupational Therapy). These new allied health programs would join the many similar programs currently offered across the CSU.

As we have seen over the past few years, there continues to be interest in data science and data-informed decision making, with projection proposals submitted by Chico (MS in Business Analytics), Northridge (MS in Accounting Analytics, MA in Business Analytics), Pomona (MS in Financial Analysis), San Diego (MS in Global Business Development), San José (BS in Data Science), and San Luis Obispo (MA in Statistics). Data scientists are experts who interpret data and give it practical significance and application. These professionals use statistics, calculus and algebra, software programming, software engineering, data-driven problem solving, and data analysis and visualization skills. Computer and information research scientists with a master's degree had a median annual wage in 2018 of \$ 118,370 (United States Department of Labor, 2020).

1. Changes to Program Projections

New Projections Proposed for Addition to Ten-Year Campus Academic Plans and to the CSU Academic Master Plan

The Academic Programs, Innovations and Faculty Development Department at the Office of the Chancellor maintains the CSU Academic Master Plan, a comprehensive list of projected programs, existing degree programs and program-review schedules for authorized degree

programs. The CSU Academic Master Plan, which guides program, faculty and facility development, will be updated to reflect the resolution adopted by the board at the March 2020 meeting. The CSU Academic Master Plan and each campus academic plan will thereafter be posted online as resources for university planning.

In addition to the CSU Academic Master Plan, the Office of the Chancellor maintains the CSU Degrees Database, an online inventory of all authorized degree programs and associated concentrations (focused areas of study within the degree program). The CSU Degrees Database informs the public CSU Search Degrees website (<http://degrees.calstate.edu>), a tool for exploring the bachelor's and graduate degree programs and concentrations currently offered at CSU campuses.

The projections listed below and in **Attachment A** indicate campus intention to develop degree programs within the coming decade. Across the system, 35 new projections are proposed, 11 at the undergraduate level and 24 at the graduate level. New programs are planned in response to student demand, employer need, faculty interest, and licensure and accreditation requirements.

Campuses have also removed twelve existing program projections from their academic plans for a variety of reasons, including shifting priorities or resources. These projections will therefore not be developed into degree proposals. The number of existing degree programs enrolling students has also decreased this year, with 24 degree programs having been changed to "suspended admission" status—meaning that additional students will not be admitted to those programs until further notice. Campuses suspend admission to degree programs for a variety of reasons. For example, program enrollment might have decreased and faculty would like to undertake a comprehensive review of the program. Programs suspended for such reasons will likely remove the suspended status after the review, and begin to admit students once again. Other programs suspend admission due to new certification requirements. Baccalaureate degree programs in Athletic Training are currently suspending admission. This is due to new certification requirements that have established the master's degree as the new entry-level degree in Athletic Training. Additionally, 18 degree programs have been "discontinued," meaning the campus will no longer offer the programs after all currently enrolled majors have completed their degree requirements. In all cases, students already matriculated into a degree program are allowed to complete their degrees, even though the program has been discontinued or is not allowing new students to enroll.

Recommendations for board approval of campus academic plans (including proposed projected programs) follow Office of the Chancellor review of campus projection proposals. Review includes consideration of "declared policy of the board to encourage broadly based degrees of high academic quality and to avoid unnecessary proliferation of degrees and terminologies" (REP-91-03). Projected programs are removed from campus academic plans if

a full degree proposal is not submitted to the Office of the Chancellor within five years of the date originally projected for implementation. Campuses may request an extension of this five-year deadline if there are compelling circumstances for such an extension.

After the board approves a projection, the campus may begin developing a full degree implementation proposal, which is submitted to the Office of the Chancellor for review and final approval as a program. With confirmation from the Office of the Chancellor, a pilot degree program may enroll students for five years. Pilot programs subsequently may be proposed for conversion to permanent status, which requires the chancellor's approval. Traditional, fast-track and pilot degree-proposal processes are described in **Attachment D**. In **Attachment A**, a ten-year overview of projected degree programs – by campus – is presented.

2. Changes to Existing Degree Programs

Programs Suspending New Admissions

Campuses have reported admission suspensions for the following degree programs, which remain on the CSU Academic Master Plan because admission may be reinstated during a future academic term. While no new matriculations will be allowed, continuously enrolled students in these programs will be allowed to complete their degrees within a reasonable timeframe.

Chico

3. Total Units Required for Bachelor of Arts and Bachelor of Science Degree Programs

During Office of the Chancellor review of baccalaureate degree proposals, the 120-unit limit remains a central consideration in evaluating curricular coherence and quality, student-learning outcomes, quality assurance, access, fiscal responsibility and service to students and employers. Ninety-eight percent of undergraduate programs require no more than the allowable number of units, whether through Title 5 allowances, or Chancellor-authorized exceptions. Title 5 allows for more than a 120-unit total for Bachelor of Fine Arts, Bachelor of Music, Bachelor of Architecture, Bachelor of Landscape Architecture and integrated teacher education preparation (ITEP) programs.

4. Summaries of WASC Senior College and University Commission Accreditation Visits

The CSU Board of Trustees adopted a resolution in January 1991 that requires an annual agenda item on academic planning and program review, including information on recent campus accreditation visits from the WASC Senior College and University Commission during the 2018-19 academic year. The accreditor granted 10-year accreditation approval to CSU Los Angeles and CSU Monterey Bay, as well as 8-year accreditation to CSU Chico, CSU Maritime Academy, and CSU Stanislaus. A summary of the WASC accreditation visits appears in **Attachment B**.

5. Accredited Academic Programs and Departments

In 1968, the CSU Board of Trustees resolved that “each State College be encouraged, in cooperation with the Office of the Chancellor, to seek accreditation of appropriate instructional programs by national professional accrediting agencies.” Campuses are therefore expected, as reasonable, to seek professional accreditation for degree programs and academic departments, schools and colleges. **Attachment C** contains the list of all reported accredited units and degree programs.

6. CSU Degree Proposal, Review and Approval Process

Attachment D details the descriptions and illustrations of procedures and policies guiding degree proposal development, review and approval.

The following resolution is recommended for adoption and refers to changes in the CSU Academic Master Plan and campus academic plans described in this agenda item.

RESOLVED, by the Board of Trustees of the California State University, that the amended projections to the Academic Plans for the California State University campuses (as identified in Agenda Item 2 of the March 24, 2020 meeting of the Committee on Educational Policy) be approved and accepted for addition to the CSU Academic Master Plan and as the basis for necessary facility planning; and be it further

RESOLVED, that those projected degree programs proposed to be included in campus academic plans be authorized for implementation, at approximately the dates indicated on Attachment A, subject in each instance to the chancellor's review, approval, and confirmation that there exists sufficient societal need, student demand, feasibility, financial support, qualified faculty, facilities and information resources sufficient to establish and maintain the programs; and be it further

RESOLVED, that degree programs not included in the campus academic plans be authorized for implementation only as pilot or fast-track programs or as modifications of existing degree programs, subject in each instance to Chancellor's Office approval and CSU policy and procedures.

CSU Academic Master Plan Ten-Year Overview of Planned Programs

Projections Proposed to the CSU Board of Trustees
Planned for Implementation between 2020-21 and 2029-30

Planned degree programs (“program projections”) appear in bold red font and are proposed for board approval at the March 2020 meeting. Existing, previously approved program projections appear in black font. Projected degree programs may remain on the CSU Academic Master Plan for five years after the originally approved implementation date, which appears in the second column from the left. Within that five-year window, planned launch years may be adjusted in response to societal need or campus schedules and resources. Current planned implementation years appear in the column to the left of the degree designation. Subsequent to approval of a projection, the campus may develop a full degree implementation proposal, which requires the chancellor’s approval in order for a program to enroll students.

**Report on Senior College and University Commission (WSCUC aka WASC)
Accreditation Activities Conducted in 2018-2019**

This report includes only those campuses that engaged in WSCUC site visit accreditation activities, and that received the results of their accreditation visit, in the past year.

California State University, Chico

In July 2019, the Senior College and University Commission (WSCUC) acted to reaffirm accreditation for CSU Chico for a period of eight years.

The Commission commended the institution for its response to the 2018 Camp Fire as well as for providing continuity and stability during recent leadership transitions. Also noted were its commitment to shared governance, effective communication, and inclusive strategic planning, which resulted in rebuilding trust and morale; the commitment to its students and student success; and its thoughtful, strategic, and collaborative approach to distance education.

The Commission asked for an update in March 2023 and charges the institution to: make the assessment and program review processes more substantial and meaningful; further develop and assess its institutional research office and facilities; devote more time and resources to supporting transfer and non-traditional learners; stabilize the administration by reducing the number of those in interim positions and increase the transparency of regular reviews of senior administrators; and to make further progress in increasing its faculty diversity.

California State University, Los Angeles

In July 2019, the Senior College and University Commission (WSCUC) acted to reaffirm accreditation for CSU Los Angeles for the maximum possible period of ten years.

The Commission commended the institution for having substantially fulfilled the intended outcomes of the WSCUC review process and to have broadly engaged the entire institution. The Commission also noted that the institution is a university “on the rise.” The significant work and change undertaken by the campus since its last reaffirmation has positioned it well for continued evolution toward even greater fulfillment of its mission.

The Commission charges the institution to: demonstrate substantial progress toward the 2025 goal for the four-year graduation rate for first-time, full-time students; define and implement a mature culture of assessment; continue to develop and implement direct assessment and program review in the co-curriculum and support services; develop and implement an integrated plan for achieving the key initiatives in the student success goal of the strategic plan; move far beyond its current efforts and programs to improve its hiring results with underrepresented faculty and high-level administrators; and continue to take steps to ensure enrollment is in line with the financial resources available to meet student needs with a focus on continued faculty hiring and professional development, new and enhanced facilities, strategic and timely advising, robust student support, and enhanced infrastructure.

California State University Maritime Academy

In July 2019, the Senior College and University Commission (WSCUC) acted to reaffirm accreditation for CSU Maritime Academy for a period of eight years.

The Commission commended the institution for the quality of its self-study and the openness with which the institution shared information that recognizes its strengths and identifies its challenges. Also noted were the institution's strong mission, vision, and strategic plans; the work done to evolve the program review procedure and the institution-wide learning outcomes assessment process; the steps taken to insure financial viability; and the external accolades and awards, completion rates, internship opportunities, industry grants, and career attainments of graduates that Cal Maritime has achieved.

The Commission charges the institution to: to build a culture of trust in the administration by reviewing and revising communication strategies, strengthening shared governance, and ensuring faculty and student inclusion in decision making; work to achieve a campus-wide consensus on a definition of leadership that integrates academic, licensure, commandant, student and student affairs perspectives; continue to build on the progress that has been made in assessment and program review by focusing on faculty development and deliberate planning of assessment methods; and assess the current status of unity and diversity on campus as the basis for creating a clear set of goals and measures of achievement for the programs and services provided.

California State University, Monterey Bay

In July 2019, the Senior College and University Commission (WSCUC) acted to reaffirm accreditation for CSU Monterey Bay for the maximum possible period of ten years.

The Commission commended the institution for: a highly engaged self-study procedure that identified key issues and accomplishments and an extraordinarily responsive process with targeted documentation and interviews aligned with Lines of Inquiry; remarkable improvements in 6-year graduation rates; the commitment to the development of the whole student in which academic and student affairs collaborate, the personal growth and counseling center, student disability resources, and support for students' basic needs; a culture of innovation; its regional stewardship in offerings such as service learning and academic majors that respond to present and emerging workforce needs; and an effective and systematic assessment and reflection for program improvement.

The Commission asked for a Special Visit in fall 2023 to address the process and progress for recruitment, hiring, and inclusion of more faculty and staff from diverse backgrounds; progress in integrating resource allocation, enrollment management, new revenue streams, and achieving economies of scale into the new strategic planning process; and improvement in academic advising. The Commission charged the institution to: strengthen outreach and recruitment efforts for faculty, staff, and administrators to reflect diversity; support early career faculty development in their roles as researchers and scholars and, provide a faculty development program for lecturers; leverage activities associated with its new strategic planning process to drive integrated resource

allocation in alignment with mission to facilitate student enrollment growth, incentivize new revenue streams, and achieve economies of scale while meeting established metrics and targets; enhance support for staff by providing increased training and professional development; and improve academic advising for all students.

California State University, Stanislaus

In July 2019, the Senior College and University Commission (WSCUC) acted to reaffirm accreditation for CSU Stanislaus for a period of eight years.

The Commission commended the institution for moving beyond the difficult environment of ten years ago and returning to a very positive campus climate. The Commission noted that the President and Provost have restored a sense of trust and collaboration across the entire campus while strong faculty leadership and faculty in general have created a vibrant and exciting learning institution. Also note were: the institution made significant progress on all issues raised in the last accreditation review; there is a high level of commitment for the assessment process across all aspects of the university; the budget process is consultative, transparent, and aligned with the new strategic plan; the GREAT Committee and the Faculty Fellows program show significant promise; students and student leaders on the Turlock campus are enthusiastic about their university; and the institution's commitment to its students and community.

The Commission charged the institution to: closely monitor, track, and support data-driven decision-making and assessment to ensure that they remain part of the university culture; while excellent progress has been made, carefully review department elaborations to ensure that retention, tenure and promotion processes are meaningful and trustworthy for those under review; develop specific assessment tools to monitor and track the direct and indirect effects of their over-enrollment policies, and develop a long-range forecast for areas of fiscal and quality concern with appropriate benchmarks to support the institution's mission and newly crafted strategic plan; develop a realistic plan to increase resources at the Stockton location including academic program quality, academic support for students and faculty, student support services, and student success; develop a specific short, medium, and long range plan and benchmarks for Stockton for both academic quality, student and faculty support, physical plant, technology, and fiscal security that would include evidence of progress or lack of progress to determine if the Stockton enterprise is viable in the long run or if a change in objective or any policies would be necessary.

California State University Accredited Programs by Campus

California State University, Bakersfield

Program	First Granted	Renewal Date
Business Administration BS, MBA	not specified	2019-2020
Computer Engineering BS	10/1/2016	2023-2024
Education MA	not specified	2021-2022

CSU Degree Proposal, Review and Approval Process

The CSU degree planning process begins with campus departmental plans and ends with a campus enrolling students in the program. Along the way, plans are subjected to review and approval by the campus, the Board of Trustees and the Chancellor's Office. Campuses may pursue one of three approaches to proposal review and approval, depending on the kind of program envisioned. The approaches are: (1) the traditional process; (2) the fast-track process; or (3) the pilot process. Each process will be explained in this review. The process is shown in Illustration 1.

Illustration 1

The Traditional Process

Degree Projections

The traditional process begins with degree projections. Each January, campuses submit projection proposals, which are very general long-term plans to develop and implement a degree program, to the Chancellor's Office for preliminary review. Projection proposals must make a supportable case that the desired degree program will meet the following criteria in order to obtain a Chancellor's Office recommendation for Board of Trustees approval at the March trustees meeting.

Chancellor's Office Projection Review Criteria (All Degree Levels)

1. Degree designation and title (e.g., BS Biochemistry);
2. Date approved by the campus-based academic senate;
3. Projected implementation date;
4. Delivery mode: fully face-to-face, hybrid or fully online program;
5. A brief summary of the purpose and characteristics of the proposed degree program;
6. Support mode: state-support or self-support;
7. Anticipated student demand;
8. Workforce demands and employment opportunities for graduates;
9. Other relevant societal needs;
10. An assessment of the required resources and a campus commitment to allocating those resources; and
11. As applicable:
 - a. If the projection is a pilot program, campuses will list the academic years during which the program will operate in pilot status.
 - b. For new degree programs that are not already offered in the CSU, campuses include a compelling rationale explaining how the proposed subject area constitutes a coherent, integrated degree program that has potential value to students and meets CSU requirements for an academic program at the undergraduate or graduate level.

Additional Criteria for Projected Bachelor's Degree Programs

Projected bachelor's degrees are general, characterized by breadth and are as enduring as possible in content and title, whereas graduate programs are more appropriately specialized.

Resource:

https://www2.calstate.edu/csu-system/administration/academic-and-student-affairs/academic-programs-innovations-and-faculty-development/Documents/breadth_epr85_13.pdf.

Additional Criteria for Projected Graduate Degree Programs

Master's degree programs should be projected only when the sponsoring department is well established and has achieved a level of quality that has been affirmed by a program review or in subjects for which national accreditation, including review by a visiting team, is available. Further requirements of new graduate programs include that:

1. There are at least five full-time faculty with the appropriate terminal degree;
2. The programs have enrollment sufficient to support offering at least four graduate-level courses each year;
3. Evidence is provided that the department can support the level of research required of a graduate program; and
4. Not less than one half of the units required for the degree shall be in courses organized primarily for graduate students.

Degree Program Proposal Development and Review Process

After obtaining Board of Trustees approval for a proposed projection, the campus may begin developing a full degree proposal, which must obtain campus approvals before being submitted for system-level review. Campus-approved degree proposals are reviewed by Chancellor's Office staff who have faculty experience and curriculum-development and review experience. Additionally, as needed, external experts review degree programs that have highly specialized curricular requirements. It is not unusual for the Chancellor's Office to request modifications to the degree requirements or the assessment plans during the review process. Proposals must obtain the chancellor's approval before the degree program can be implemented and enroll students. All degree program proposals are governed by California Education Code and systemwide policy, including Title 5 regulations, executive orders and coded memoranda.

Illustration 2 depicts the process for the "traditional degree program proposal." This process is used for bachelor's, master's and doctoral programs that will be run either through state support or through self-support/extended education. In this process, the full degree proposal is submitted to the Chancellor's Office a year ahead of planned implementation.

Illustration 2

Degree Proposal Review Criteria

During the proposal review process, reviewers evaluate proposed programs and resources according to the following review criteria:

- **Faculty**

Do the faculty appear qualified to offer this program and at this level? Does the faculty expertise span all appropriate specializations, and are there sufficient faculty members for the projected size of the program? Do they appear to have appropriate research or professional experience? Are the arrangements for administering the program sufficient to ensure that it will operate effectively?

- **Curriculum**

Does the curriculum have appropriate breadth, depth and coherence for an undergraduate or a graduate program in this field? Is it up to date, incorporating the most recent developments in the field? Is it consistent with any pertinent recommendations of professional organizations? Is it responsive to employment opportunities for graduates? If it is a baccalaureate program, would it constitute desirable preparation for graduate or doctoral study in the fields indicated in the proposal? Does the proposed bachelor's degree meet the applicable Bachelor of Arts (BA) and Bachelor of Science (BS) requirements established in Title 5? If the proposal is for a BA or BS degree, does it require no more than 120 units, or does the proposal provide a well-defended rationale for exceeding the Title 5 limit of 120 units for BA and BS degrees? Does the graduate program meet Title 5 section 40510 master's degree requirements?

- **Resources**

Does the description of facilities, equipment and information resources indicate that the campus has the resources (or reliable access to resources) that will be needed for a high-quality program? If not, what information would be minimally necessary to ensure that the resources are adequate? For self-support programs, does the budget contain three-to-five years of operation, showing multiple cohorts? Does it show full cost recovery, and are the student costs within market ranges for similar extension programs?

- **Assessment of Program Quality and Student Learning**

Does the proposal provide an assessment plan that identifies program and student learning goals? Do the student learning outcomes match with the curriculum? Are goals measurable, and will the assessment process be manageable? Is the process meaningful, with assessment results used to influence changes in the curriculum or pedagogy?

- **State Need and Student Demand**

Is a program of this kind needed in California? Is there convincing evidence provided in the proposal to demonstrate student interest in the program and employer demand for graduates? Are the sources of information on need current and credible? If the information on need for the program

is not adequate, what other information might it be suggested that the campus include in the proposal?

- **Multi-Year Cost-Recovery Budget (Self-Support Programs)**

Does the budget include sufficient years to follow multiple cohorts? Is an appropriate level of student attrition built in? Are costs related to hybrid or online delivery and technical support included for programs not offered entirely in face-to-face mode?

The Fast-Track Process: Combined Projection and Proposal

To review, in the traditional proposal process, a campus requests Board of Trustee approval to include a projection on the campus Academic Plan. Subsequent to Board of Trustee approval of the projection, the campus may begin developing a degree proposal that will be submitted to the Chancellor's Office for system-level review and approval. In the traditional process, proposals are to be submitted in the academic year preceding planned implementation.

As adopted by the Board of Trustees in July 1997, a "fast-track" process shortens the time to implementation by allowing proposals to be submitted at the same time that the projection is proposed to the Board of Trustees. Fast-track proposals still undergo system-level review, and the fast track does not move the proposal through an expedited review process.

Fast-Track Criteria

To be proposed via fast track, a degree program must meet all of the following six criteria:

1. The proposed program could be offered at a high level of quality by the campus within the campus's existing resource base, or there is a demonstrated capacity to fund the program on a self-support basis.
2. The proposed program is not subject to specialized accreditation by an agency that is a member of the Association of Specialized and Professional Accreditors, or it is currently offered as an option or concentration that is already recognized and accredited by an appropriate specialized accrediting agency.
3. The proposed program can be adequately housed without a major capital outlay project.
4. It is consistent with all existing state and federal law, trustee policy and executive orders.
5. It is either a bachelor's or master's degree program.
6. The proposed program has been subject to a thorough campus review and approval process.

Fast-Track Timelines

- The first Monday in January—for July approval
- The second Monday in June—for December approval

Fast-track proposals that are submitted to the Chancellor's Office by the first Monday in January, and that raise no major issues, can be acted on by the Board of Trustees in March, sent through system-level review and could receive Chancellor's Office approval in July.

Proposals that are submitted by the second Monday in June and raise no major issues can be acted on by the Board of Trustees in September, sent through system-level review and could receive Chancellor's Office approval in December.

Submitting Fast-Track Proposals

When submitting an update to the campus Academic Plan, the campus notes any fast-track degree proposals and includes a very brief description of the program and a rationale for offering it through the fast-track process.

Resource:

https://www2.calstate.edu/csu-system/administration/academic-and-student-affairs/academic-programs-innovations-and-faculty-development/Documents/fast_track_pilot_programs.pdf

The Pilot Degree Program Proposal Process

In support of the CSU tradition of experimentation in the planning and offering of degree programs, Board of Trustee policy established in July 1997 that a limited number of proposals meeting fast-track criteria might be implemented as five-year "pilot programs" without prior review and approval by the board. Instead, the Chancellor's Office conducts a review to confirm that all applicable policy requirements have been met. For self-support pilot programs, the Chancellor's Office also reviews proposed projected budgets to ensure all costs will be recovered through student fees and without relying on state funds.

Pilot-Program Criteria

Pilot degree programs must meet all of the following six criteria:

1. The proposed program could be offered at a high level of quality by the campus within the campus's existing resource base, or there is a demonstrated capacity to fund the program on a self-support basis.
2. The proposed program is not subject to specialized accreditation by an agency that is a member of the Association of Specialized and Professional Accreditors, or it is currently offered as an option or concentration that is already recognized and accredited by an appropriate specialized accrediting agency.
3. The proposed program can be adequately housed without a major capital outlay project.
4. It is consistent with all existing state and federal law, trustee policy and executive orders.
5. It is either a bachelor's or master's degree program.
6. The proposed program has been subject to a thorough campus review and approval process.

Pilot Program Implementation Procedures

1. Prior to implementation, the campus is obligated to (1) notify the Chancellor's Office of plans to establish the program, (2) provide a program description and list of curricular requirements and (3) confirm that each of the six pilot criteria apply to the pilot program.
2. While Chancellor's Office approval is not required, a pilot program must be acknowledged by the Chancellor's Office before the program is implemented.
3. A campus may implement a pilot program without first proposing the projection on the campus Academic Plan. In such cases, the program will be identified as a pilot program in the next annual update of the campus Academic Plan.

Pilot Operational Policy

1. A pilot program is authorized to operate only for five years.
2. If no further action is taken by the end of the five years, no new students can be admitted to the pilot program.
3. The campus is obliged to make appropriate arrangements for students already enrolled to complete the program.

Pilot Conversion Procedures

For the program to continue beyond the five-year limit, the campus must propose to the Chancellor's Office converting the program from pilot to regular status. A pilot program could be converted to regular-program status and approved to continue to operate indefinitely if the following conditions are met:

1. The campus committed the resources necessary to maintain the program beyond five years;
2. A thorough program evaluation (including an on-site review by one or more experts in the field) showed the program to be of high quality; to be attractive to students; and to produce graduates attractive to prospective employers and/or graduate programs, as appropriate; and
3. Approval by the chancellor after review and comment by the Chancellor's Office.

COMMITTEE ON EDUCATIONAL POLICY

Academic Preparation

Presentation By

Loren J. Blanchard
Executive Vice Chancellor
Academic and Student Affairs

James T. Minor
Assistant Vice Chancellor and Senior Strategist
Academic Success and Inclusive Excellence

This annual item provides a progress update on the first year after implementation of Executive Order 1110.

Background

Achieving the goals of increasing degree completion and eliminating equity gaps among CSU students is contingent on improving the level of academic preparation of incoming students. Central to this effort is the need to fundamentally transform the CSU's approach to serving students who arrive in need of additional academic support. What happens to students in the first year of college can determine if they are retained for their second year and ultimately earn a college degree. This is, in large part, why the issue of academic preparation has been a top priority for Graduation Initiative 2025.

In August 2017, Chancellor White issued Executive Order 1110 to effectively address three issues related to academic preparation among admitted students. The policy changes were designed to:

1. Revise the way the CSU assesses college readiness and places students in first-year courses;
2. Strengthen the CSU Early Start Program to offer students college credit in the summer before their first term; and
3. Discontinue stand-alone developmental education courses.

Assessment and Placement

Prior to Executive Order 1110, incoming first year students were placed into two broad categories—college-ready or not college-ready—based largely on standardized exams. Results from these exams were used to place students into first-year math and written communication courses. Students identified as “ready” enrolled in college-level courses immediately. Students identified as “not ready” were primarily assigned to stand-alone developmental education courses that did not confer college credit.

Executive Order 1110 broadens the incorporation of information used to assess student readiness for college-level courses (i.e. the use of multiple measures). In addition to the traditional measures used to determine readiness such as scores from the ACT, SAT, Advanced Placement (AP), International Baccalaureate (IB) or Smarter Balanced Assessment, the CSU now incorporates high school English and mathematics courses completed, the grades earned in those courses and high school grade point averages (GPA).

High school grades, when used as one of multiple measures, are shown to be a stronger predictor of how likely students are to achieve course outcomes over an academic term if given the opportunity. Placing a greater emphasis on previous classroom performance is expected to improve student assessment and help customize academic support. Today, rather than being placed into two broad categories (college-ready and not college-ready), students are placed across four categories to better address their academic needs upon entry.

Category I: Student has fulfilled the GE Subarea A2 or B4 requirement upon arrival

Student has met the CSU GE Breadth Subarea A2 and/or B4 requirement via Advanced Placement (AP) examination, International Baccalaureate (IB) examination or transferable college course.

Category II: Student placed directly into a GE Subarea A2 or B4 course

Student has met the readiness standards via one or several of the multiple measures-informed standards.

Category III: Student placed into a supported college-level course

Based on multiple measures, students demonstrate a need for additional academic support in math and/or written communication. These students are placed directly into college-level courses that embed or attach additional academic support. Participation in the CSU Early Start Program is recommended but not required.

Category IV: Student required to attend the CSU Early Start Program

Based on multiple measures, students demonstrate a need for intense academic support. Participation in the Early Start Program is required and designed to provide students intense and focused support while allowing them an opportunity to earn college-credit in the summer before their first term.

The CSU Early Start Program

Executive Order 1110 supersedes the previous policy, Executive Order 1048 issued in June 2010, governing the CSU Early Start Program. Effective summer 2019, students required to attend the Early Start Program earned college credit the summer before beginning their first term. The Early Start Program offers credit-bearing courses in mathematics and written communication systemwide. Instructional content considered pre-baccalaureate (or remedial) is limited to a maximum of two units and can only be offered concurrently with a college-level course. The CSU provides financial support to cover Early Start Program fees for students based on standard financial aid practices including expected family contribution calculations.

Developmental Education Reform

Beginning fall 2018, no CSU student was required to enroll in a stand-alone developmental education course for no credit. Students placed in Categories III and IV, referenced above, were offered college-level math and written communication courses with support embedded or attached to the course. Supportive course models include, among others, co-requisite approaches, coordinated supplemental instruction modules or “stretch” formats that could extend a course beyond one academic term.

New course models are not intended to compromise academic quality or rigor. The objective is not to change learning outcomes of the course, rather it is to change the way campuses support students to meet those outcomes. CSU faculty worked diligently to redesign courses and to develop complementary support modules.

The data presented reflect outcomes after one year. Tracking the fall 2018 cohort through the completion of their second year and beyond will provide a more comprehensive assessment of their performance following implementation. Still, the first-year results provide important information to help understand differences in course-taking and academic progress. The systemwide data provided here are derived from grade files submitted by campuses. The data are presented in the aggregate representing all 23 CSU campuses.

Math/Quantitative Reasoning Outcomes

Over the past two years, faculty have made significant pedagogical changes and engaged in professional development related to college-level Mathematics/Quantitative Reasoning courses. By the end of spring 2019, overall 74% of fall 2018 new students completed Mathematics/QR (B4) General Education (63% for fall 2017 first-time students at similar point), 81% of Category I/II students completed B4 (76% for fall 2017 college ready at entry) and 54% of Category III/IV students completed B4 (27% for fall 2017 needing addition preparation).

CSU Math/QR Outcomes Fall 2018 first-time students	Number of students	% meeting Math/QR General Education requirement at end of first year
Entering class (all)	66,803	74%
Placement I/II	49,440	81%
Placement III/IV	17,363	54%

The gains in mathematics/quantitative reasoning general education completion ensure that more students than ever before are on their path to degree after the first year. We expect over time the gap in general education requirement completion by placement grouping will narrow further as courses and support structures continue to be refined.

Written Communication

Success in Written Communication outcomes looks different than in Mathematics/Quantitative Reasoning. Pedagogical changes resulting from EO 1110 to Written Communications courses were limited. Many campuses employed curricula including stretch models of instruction used prior to EO 1110. The biggest change resulting from EO 1110 was a reduction in students identified as needing additional preparation (more than 3,600 fewer than fall 2017).

By the end of spring 2019, overall 82% of fall 18 new students completed A2 (79% for fall 2017 first-time students at similar point), 84% of Category I/II students completed A2 (81% for fall 2017 college ready at entry) and 65% of Category III/IV students completed A2 (68% for fall 2017 needing addition preparation).

CSU Written Comm. Outcomes Fall 2018 first-time students	Number of students	% meeting Written Comm. General Education requirement at end of first year
Entering class (all)	66,803	82%
Placement I/II	59,271	84%
Placement III/IV	7,532	65%

Gains overall in written communications completion reflect the good work of CSU faculty related to EO 1110 changes. First year outcomes suggest a need for further efforts related to the supported instructional models necessary to ensure that category III and IV students do not, over time, find themselves lagging their category I and II peers in course completion.

Early Interpretations

First-year results provide an opportunity to refute concerns expressed in 2017-18 that policy changes associated with Executive Order 1110 are categorically detrimental for students. Students in the fall 2018 cohort are already experiencing better initial outcomes in first-year Mathematics/Quantitative Reasoning and Written Communication courses compared to previous cohorts. For CSU's underserved students, these outcomes can have a significant impact on closing equity gaps.

There remain opportunities for improvement. The Office of the Chancellor will continue to support campus improvement efforts with the expectation that the program models will have an even greater benefit to students over time. These data provide an opportunity to examine structural variation across campuses, to learn from common implementation challenges, and to ask better questions going forward about how to more effectively serve students.

Systemwide Evaluation

The Office of the Chancellor is partnering with WestEd, a nonprofit research agency that works with education and other communities to promote excellence, improve learning and achieve equity for all learners. Consultation with CSU stakeholders about the study began in 2017 to inform the design of the Implementation Studies Project (ISP). The project covers a three-year period consisting of formative and summative studies that will inform the CSU system about the pathways students take and the progress they make immediately after the implementation of Executive Order 1110.

Summary

Addressing academic preparation has been a primary area of focus for the CSU's Graduation Initiative 2025. The Office of the Chancellor will continue to monitor the outcomes of Executive Order 1110 and will provide an annual update to the board when those data are available. Delivering these new course models across the CSU can be a major factor for achieving the goal of eliminating equity gaps. Nationally, developmental education courses are considered a major contributor to attrition. The CSU has done away with stand-alone developmental education courses. With these progressive reforms, the CSU has leapt ahead of many states and institutions in embracing models to support the success of all students. Rather than beginning college with a deficit, students who arrive in need of additional academic support now have an opportunity to earn college credit on their first day while receiving the support they need to be successful.

COMMITTEE ON EDUCATIONAL POLICY

Approval of Recommended Amendments to Title 5 Regarding Occupational Therapy Doctorate Degree Programs

Presentation By

Loren J. Blanchard
Executive Vice Chancellor
Academic and Student Affairs

Alison M. Wrynn
Associate Vice Chancellor
Academic Programs, Innovations, and Faculty Development

Summary

This item presents for board action Title 5 amendments introduced during the January 28-29, 2020 meeting. Recent changes in legislation authorize the California State University (CSU) to offer Occupational Therapy Doctorate (OTD) degree programs and require corresponding Title 5 amendments. Resolutions are proposed for board adoption regarding OTD regulations.

Background

Title 5 amendments to regulations governing CSU OTD programs are proposed in response to Assembly Bill 829, *California State University: Doctor of Occupational Therapy Program* (Bloom), which was signed into law by Governor Newsom on August 30, 2019, and gave the CSU OTD degree-granting authority.

Correspondingly, amendments to the following Title 5 sections are recommended.

- **§ 40050.5 Function: Instruction Leading to the Occupational Therapy Doctorate Degree.**
This amendment establishes CSU independent authority to offer OTD degrees.
- **§ 40519 The Occupational Therapy Doctorate Degree.**
This amendment establishes the OTD degree program scope, the minimum number of degree units, and reflects professional conventions regarding the doctoral capstone.
- **§ 40519.1 The Occupational Therapy Doctorate Degree: Requirements.**
This amendment establishes the minimum requirements for completion of the program.

- **§ 41024 Admission to Occupational Therapy Doctorate Programs.**
This amendment establishes admission requirements for the degree program.

The following resolution is proposed for adoption:

RESOLVED, by the Board of Trustees of the California State University, acting under the authority prescribed herein and pursuant to Section 89030 and 89030.1 of the Education Code, that sections 40050.5, 40519, 40519.1 and 41024 of Title 5 of the California Code of Regulations are amended as follows:

Title 5, California Code of Regulations
Division 5 – Board of Trustees of the California State Universities
Chapter 1 – California State University
Subchapter 2 – Educational Programs
Article 1 – General Function

§ 40050.5. Function: Instruction Leading to the Occupational Therapy Doctorate Degree.

Notwithstanding Section 40050, the Occupational Therapy Doctorate degree may be awarded independently of any other institution of higher education, provided that the program leading to the degree satisfies the criteria in section 40519.

Note: Authority cited: Sections 66043, 66043.1, 66600, 89030 and 89035, Education Code.
Reference: Sections 66043, 66043.1, 66600, 89030 and 89035, Education Code.

Title 5, California Code of Regulations
Division 5 – Board of Trustees of the California State Universities
Chapter 1 – California State University
Subchapter 2 – Educational Programs
Article 7 – Graduate Degrees

§ 40519. The Occupational Therapy Doctorate Degree.

(a) A California State University program leading to an Occupational Therapy Doctorate degree may be offered independently of any other institution of higher education. California State University Occupational Therapy Doctorate programs shall:
(1) provide curriculum grounded in evidence-based practice;
(2) prepare graduates to participate in the field of occupational therapy; and
(3) be consistent with the requirements of a professional accrediting body and California state licensure laws.

(b) Each campus offering a program leading to an Occupational Therapy Doctorate degree shall establish requirements for admission to the program. The requirements for admission shall include, at a minimum, the requirements stated in Section 41024.

(c) The program leading to the Occupational Therapy Doctorate degree shall conform to the following specifications:

(1) The curriculum shall include learning experiences that balance research, theory, clinical education and practice. The core curriculum shall provide professional preparation focusing on critical thinking and decision making, including but not limited to: foundational sciences, clinical sciences and behavioral sciences; professional practice; patient/client management; and practice management.

(2) The postbaccalaureate pattern of study shall be composed of at least 110 semester units earned in graduate standing.

(3) At least 60 semester units shall be completed in residence at the campus awarding the degree. At the discretion of the appropriate campus authority, courses required for California State University Occupational Therapy Doctorate programs that are completed at another CSU campus may apply toward the residency requirement at the CSU campus that awards the degree.

(4) A qualifying assessment shall be required.

(5) The pattern of study shall include successful completion of a doctoral capstone in accordance with accreditation standards that is expected to contribute to knowledge in occupational therapy science or to an improvement in occupational therapy practice, policy or client outcomes.

(A) The doctoral capstone shall demonstrate the student's doctoral-level mastery of research skills, occupational science and/or current evidence-based practice. It shall demonstrate critical and independent thinking and a command of the research literature.

(B) The written component of the doctoral capstone shall demonstrate originality, evidencing critical and independent thinking. It shall be organized in an appropriate form and shall identify the research problem and question(s), state the major theoretical perspectives, explain the significance of the undertaking, relate it to the relevant scholarly and professional literature, identify the methods of gathering and analyzing the data, analyze and interpret data and offer a conclusion or recommendation.

(C) An oral defense or presentation of the doctoral capstone may be required.

(D) No more than fifteen semester units shall be allowed for the doctoral capstone.

Note: Authority cited: Sections 66043, 66043.1, 66600, 89030 and 89035, Education Code.

Reference: Sections 66043, 66043.1, 66600, 89030 and 89035, Education Code.

Title 5, California Code of Regulations
Division 5 – Board of Trustees of the California State Universities
Chapter 1 – California State University
Subchapter 2 – Educational Programs
Article 7 – Graduate Degrees

§ 40519.1. The Occupational Therapy Doctorate Degree: Requirements.

(a) Advancement to Candidacy. For advancement to candidacy for the Occupational Therapy Doctorate degree, the student shall have achieved classified graduate standing and met such particular requirements as the chancellor and appropriate campus authority may prescribe. The requirements shall include a qualifying doctoral assessment.

(b) To be eligible for the Occupational Therapy Doctorate degree, the candidate shall have completed a program of study that includes: a qualifying examination or other qualifying doctoral assessment, and a doctoral capstone that is consistent with the specifications in section 40519 and is approved by the appropriate campus authority. A grade point average of 3.00 (grade of B) or better shall have been earned in aggregate in courses taken to satisfy the requirements for the degree, except that a course in which no letter grade is assigned shall not be used in computing the grade point average.

(c) The student shall have completed all requirements for the degree within five years of achieving classified standing in the doctoral program. The appropriate campus authority may extend the time for completion of the requirements if:

(1) the student is in good standing,

(2) the extension is warranted by compelling individual circumstances, and

(3) the student demonstrates current knowledge of research and practice in occupational therapy, as required by the campus.

Note: Authority cited: Sections 66043, 66043.1, 66600, 89030 and 89035, Education Code.

Reference: Sections 66043, 66043.1, 66600, 89030 and 89035, Education Code.

Title 5, California Code of Regulations
Division 5 – Board of Trustees of the California State Universities
Chapter 1 – California State University
Subchapter 3 – Admission Requirements
Article 8 – Admission of Post-Baccalaureate and Graduate Students

§ 41024. Admission to Occupational Therapy Doctorate Programs.

(a) An applicant may be admitted with classified graduate standing to a program leading to an Occupational Therapy Doctorate degree established pursuant to Section 40519 if the applicant satisfies the requirements of each of the following numbered subdivisions:

- (1) The applicant holds an acceptable baccalaureate degree earned at an institution accredited by a regional accrediting association or the applicant has completed equivalent academic preparation as determined by the appropriate campus authority.
- (2) The applicant has an overall cumulative grade point average of at least 3.00 in upper-division baccalaureate study, postbaccalaureate and master's study combined.
- (3) The student has completed all campus-required prerequisite coursework.
- (4) The applicant must have been in good academic standing at the last institution.
- (5) The applicant has met any additional requirements established by the chancellor in consultation with the faculty and any additional requirements prescribed by the appropriate campus authority.

Note: Authority cited: Sections 66043, 66043.1, 66600, 89030 and 89035, Education Code.
Reference: Sections 66043, 66043.1, 66600, 89030 and 89035, Education Code.
