Detailed Scope of Work

- This documents a thorough account of activities the contractor must perform to complete the job.
 - Collaborative document between owner and contractor
 - Defines the project's scale, location, and description
 - Details out items such as paint color, types of materials, strength of concrete required, etc.
- An agreed Scope of Work is **very** important! This is a prime opportunity for the contractor and campus to dissect the project into smaller details and produce an agreed scope of work to be used to build an accurate price proposal.

Contractor Adjustment Factor

Importance of Adjustment Factors

- Determines Lowest Bidder AND
- Used to Price Individual Work Orders
- Price Proposal Total Becomes the Lump Sum Job Order Amount

	Unit Price	x	Quantity	x	Adjustment Factor	=	Total for Task
+	Unit Price	x	Quantity	x	Adjustment Factor	=	Total for Task
+	Unit Price	x	Quantity	x	Adjustment Factor	=	Total for Task
							<hr/>
							Total Job Order Price

Adjustment Factors

- Adjustment Factors include (but not limited to):
 - All overhead, profit and taxes for the contractor and subcontractor
 - Prep and modifications of proposals
 - Office trailers and portable toilets
 - Construction vehicles and storage devices
 - All PPE
 - Daily and final clean-up
 - Protection of all surfaces
 - Site Supervision and management meetings

*Please review Understanding the
Construction Cost Catalog® for comprehensive listing*

Cost Escalation

- Per the General Conditions, the **contractor is responsible for changes** in material and labor costs throughout the term of the contract.
- The contractor is required to **plan for escalation** at the time of the bid.
- Contractor **cannot come back for additional compensation** to cover escalation.

Risks of Low Adjustment Factor

- Leads to Arguments in Proposal Review
 - Unsupportable Tasks
 - Exaggerated Quantities
- Leads to Delays in Work Order Development
 - Takes Longer to Review Proposals
- Creates an Adversarial Relationship
 - Reduced Volume of Work
 - Will Shorten Contract
 - Lost Profitability
- **No Second Chance to Improve your Margin**

Method to Calculate Factors

1. Use Historical Project Data
2. Select a Completed Project You Know Scope and Direct Costs
3. Price Project From CTC
4. Add on Overhead and Profit
5. Calculate the Adjustment Factor
