*BUILD Program offers intensive research-training opportunities for undergraduate students interested in pursuing a career in health-related research.

**BUILD PODER is open to all undergraduate students at CSUN and community college partners in biological, health, and social sciences, whose focus is biomedically-related. Building Infrastructure Leading to Diversity (BUILD) Promoting Opportunities for Diversity in Education and Research (PODER) is an undergraduate research training program funded by the National Institutes of Health (NIH).

***Minority Opportunities in Research (MORE) Programs at California State University, Los Angeles makes available to the American scientific research enterprise the creativity and intellectual talents of minority group members.
